Expert in Data Science and Analytics with AI

The "Expert in Data Science and Analytics with AI" course is designed to equip learners with the knowledge and skills needed to excel in data science, analytics, and artificial intelligence. This comprehensive program covers Python, SQL, data manipulation, statistics, probability, exploratory data analysis, machine learning, deep learning, and AI-driven analytics. Learners will gain expertise in data visualization using Tableau and Power BI, as well as big data technologies like Hadoop, Spark, AWS, and Google Cloud. With hands-on projects and real-world applications, this course is ideal for students, graduates, working professionals, and entrepreneurs looking to upskill and leverage data-driven decision-making. By the end of the course, participants will acquire industry-relevant skills, practical experience, and certification to advance their careers in the field of data science and AI.

Hottest **Job of 21st Century**

1.1 Million Job Opportunities

The global demand for Data Science professionals is projected to reach 1.1 million job openings by 2026.

Future-Proof Your Career with Data Science & AI!

With demand soaring across industries, mastering these skills ensures stability, growth, and high-paying roles.

Preferred Qualification

43% of Data Science professionals hold a Master's degree, proving the value of advanced qualifications in this booming field.

In-Demand Skills

Data Science professionals gain industry-relevant skills, unlocking access to high-paying career opportunities across diverse industries

Expanding Industry

The Data Science industry is expected to grow at a 26.9% CAGR globally by 2030, creating massive career opportunities.

Rising Job Market Demand

By 2022, India and the US faced a 250,000 professional shortage in Data Science & AI roles, highlighting the soaring demand for experts in these fields.

Key Highlights

- ✓ 208 Hrs of Self-Paced Learning
- ✓ 6 months of Live Sessions from Industry Experts
- ✓ Dedicated Career Services Sessions
- ✓ Pre-recorded & AI Learning Videos
- ✓ One-on-One with Industry Mentors
- ✓ Suitable for Technical as well as Non-technical Graduates
- ✓ 30+ Industry Projects & Case Studies
- ✓ Essential Soft Skills Training
- ✓ 24*7 Support
- ✓ Revision & Doubt Clearing Sessions on Weekends
- ✓ Certification from CloudBlitz
- ✓ Job & Placement Support
- ✓ Mock Interview Sessions
- ✓ Dedicated Learning Management Team
- ✓ Weekly Yoga & Meditation sessions
- ✓ Free Communication sessions

Program Pedagogy

Instructor led Training

Get trained by top industry experts

Technical Support

Speak to Subject Matter Experts anytime and clarify your queries instantly

Self-paced videos

Learn at your own pace with world-class content

Projects and Exercises

Get real-world experience through projects

Hackathons

Get a sense of how real projects are built

Peer Networking and Group Learning

Improve your professional network and learn from peers through our innovative Peer Chat tool

Gamified Learning

Get involved in group activities to solve real-world problems

1:1 Personalized Learning

Hands-on exercises, project work, quizzes and capstone projects

Who Can **Apply** for the **Course?**

- ✓ Individuals who have pursued B.E., B.Tech, B.Sc, BCA., M.E., M.Tech, B.Com, M.Com, M.Sc., and MCA.
- ✓ College students in the last year of their graduation or post-graduation or fresh graduates.
- ✓ Any working professional up to 35 years old.
- ✓ Anyone looking for a career transition to Cloud computing and DevOps.
- ✓ Candidates with an annual salary of less than 7 lakhs
- ✓ Candidates from Technical and Non-Technical domains can apply

Application **Process**

The application process consists of three simple steps. Candidates have to submit their applications. An offer of admission will be made to the selected candidates and their application will be accepted upon the payment of the admission fee.

Degree Career Support: Your Complete Path to Success

1. Start Strong: Enrollment

Begin your career journey by enrolling in our comprehensive program, designed to provide full support from day one. This sets the foundation for everything you need to succeed.

2. Active Learning: Attendance, Assessments & Assignments

Stay committed with regular attendance, engaging assessments, and hands-on assignments that ensure you're continuously building the skills necessary for your field.

3. Mastering Soft Skills: Communication & Professionalism

Develop key soft skills that employers value:
Master professional email etiquette
Enhance written and verbal communication
Build interpersonal skills that boost collaboration and workplace success

4. Hands-On Training: 80% Practical, 20% Theory

With a strong focus on practical learning, 80% of the program involves real-world application. The remaining 20% is essential theory that depends your understanding and supports your practical skills.

5. Reinforce Your Knowledge: Revisions

Regular revision sessions ensure you fully grasp concepts and stay prepared for future challenges. This step solidifies what you've learned and keeps you on track for success.

6. Mock Interviews: Real-World Job Prep

Get interview-ready with mock interview sessions. These simulations help you build confidence, refine your responses, and prepare for real-world job interviews, ensuring you're polished and ready from every angle.

7. Polish Your Profile: Resume Preparation

Learn to create a high-impact resume that grabs the attention of recruiters and hiring managers. Our experts guide you to showcase your skills, achievements and career goals in the most professional way.

8. Boost Your Visibility: Job Portfolio Development

Build a strong digital presence on platforms like Naukri, LinkedIn and other job portals. This boosts your online visibility, increasing the chances of attracting employers and landing interviews.

9. Prove Your Skills: Projects & Final Exams

Cap off your journey by completing industry-relevant projects and final exams. These are designed to prove your capabilities and prepare you for real-world challenges in your chosen career path.

10. Continuous Job Support: We're With You Until You Land the Job

Even after the course our support doesn't stop. We offer continuous job placement assistance until you secure the right role. From job applications to interview scheduling, we're with you every step of the way until you find the perfect career match.

Program Syllabus

Core Python

- Introduction to Data Science
- Introduction to Python
- Play with Variables and Data Types
- Fundamentals of Python Expressions
- Conditional Statements
- Data Structure: List
- Data Structure: Tuples
- Loops and Iterations
- Designing Patterns
- Data Structure: Sets
- Data Structure: Dictionary
- Functions in Python
- Structure Code with OOP Principles
- Regular Expressions (Regex)
- Optical Character Recognition
- Handle Error and Exceptions

Advance Python

- Package Management in Python
- Data Manipulation with Pandas Arrays in Python
- Statistical Analysis with Numpy
- Data Visualization
- Working with Data Files
- Advance Data Manipulation Techniques

SQL - Structured Query Language

- Introduction to SQL
- Data Query Basics
- DDL - Data Definition Language
- Constraints in SQL
- DML - Data Manipulation Language
- DTL Essentials
- Joining Tables
- Aggregate Functions
- Understanding Clauses
- Connecting to Database using Python

Statistics

- Introduction to Statistics
- Descriptive Statistics
- Measure of Dispersion
- Graphs / Charts in Statistics
- Probability Fundamentals

- Inferential Statistics
- Hypothesis Testing
- CHI-Square Testing

Machine Learning

- Introduction to Machine Learning
- Supervised Machine Learning
- Regression Analysis
- Classification Techniques
- Unsupervised Machine Learning
- Underfitting and Overfitting in ML
- Hyperparameter Tuning
- Balancing Precision

Deep Learning

- Introduction to Deep Learning
- Basics of Neural Network
- Artificial Neural Network
- Deep Learning Frameworks
- Convolutional Neural Network
- Recurrent Neural Network
- Generative Adversarial Network
- Natural Language Processing
- Transformers and Attention Mechanisms

AI - Artificial Intelligence

- Fundamentals of Artificial Intelligence
- Problem Solving and Search Algorithms
- Knowledge Engineering in AI
- Application of game theory
- AI in Sentiment Analysis
- AI in Core Business
- Deep Dive with Generative Model
- Transfer Learning
- Fine Tuning Models
- Graph Neural Networks
- Social Network Analysis

BI - Business Intelligence

- Introduction to BI tools
- Introduction to Tableau
- Basic Data Operations
- Graphs in Tableau
- Sets Tableau Calculations
- Interactive Dashboards
- Case Studies

Advance Excel

- Introduction to Excel
- Conditional Formatting
- Data Analysis Functions
- Pivot Tables
- Data Validation
- Excel in Data Science

R-Programming

- Introduction to R-Programming and R-Studio
- Play with Variables and Data Types
- Fundamentals of Python Expressions
- Conditional Statements
- Loops and Iterations
- Vector and Matrix in R
- Arrays, List, and DataFrames in R
- Strings and Manipulation
- Machine Learning in R

Course **Projects**

Projects cover the following industries:

Retail

Social Media

Supply Chain

Entrepreneurship

E-commerce Banking

Healthcare Insurance

Predictive Analytics

Beginner

House Price Prediction using regression algorithms. - Customer Churn Prediction for businesses.

Classification Problems

Beginner

Spam Email Detection using Naive Bayes. - Image Classification (e.g., Cats vs. Dogs) using traditional ML models.

Recommendation Systems

Beginner

Movie Recommendation System using collaborative filtering.

Natural Language Processing (NLP)

Beginner

Sentiment Analysis on social media data (e.g., Twitter, Reddit).

Predictive Analytics

Intermediate

Stock Market Price Prediction using time series analysis.

Classification Problems

Intermediate

Sentiment Analysis on social media data (e.g., Twitter, Reddit).

Anomaly Detection

Intermediate

Fraud Detection in financial transactions. - Network Intrusion Detection for cybersecurity

Recommendation Systems

Intermediate

Product Recommendation System for e-commerce platforms.

Natural Language Processing (NLP)

Advanced

Language Translation using sequence-to-sequence models.

Healthcare Applications

Advanced

Predicting Patient Outcomes using Electronic Health Records (EHR).

Frequently Asked Questions

What are the terms and conditions to be eligible for the job opportunity program?

To avail the guaranteed job interviews, you'll have to:

Maintain attendance of at least 85% during the live classes for each phase of the program.

Submit all your course-end projects and capstone projects within 7 days of program completion.

Mandatorily submit all assignments, projects and case studies within the due timeline.

Successfully completed all the course modules along with at least 80% of the self learning videos.

Avoid malpractices during appearing for the test or assignment submission else you will be permanently disqualified from this program.

Candidates must clear the PRT (Placement Readiness Test) after the course completion to get into the placement pool and get access to our job portal as well as the career mentoring program.

What is expected from a candidate during the job assistance period?

The following is expected from the candidates during the job-assistance program:

Should give their 100% to secure a good job.

Attend all the career preparation sessions that are conducted.

Remain active in job search and apply to at least 30 jobs per month.

Once shortlisted for an interview, the candidate should go through the entire selection process.

Candidates should be open to relocation to the company's location.

Note : Failure to comply with any of the above will result in debarring from the placement process.

Frequently Asked Questions

What are the eligibility criteria for this program?

To be eligible for this program, you will need to meet the following criteria:

Hold a degree in B.E., B.Tech, B.Sc., BCA, M.E., M.Tech, M.Sc. or MCA.

Be a working professional up to 35 years of age.

Have a minimum of 50% marks throughout their academic journey (X, XII, Graduation, and Postgraduation).

Possess valid mark sheets and degree certificates for verification.

Be legally eligible to work in India.

Have a valid Aadhar Card and PAN Card.

Pass a background check from their previous employer/institution.

Note: Final-year students must submit all mark sheets & certificates up to their last semester (with at least 50%) and provide proof from their college mentioning the expected month and year of graduation.

What is the process of getting into the placement pool?

To qualify for the placement pool, candidates must:

Successfully complete the course along with the submission of all projects and assignments.

Clear the Placement Readiness Test (PRT) to gain access to the job portal and career mentoring program.

What are the eligibility criteria for the job opportunity program?

To avail guaranteed job interviews, candidates must:

Maintain 85% attendance in live classes.

Submit all course-end and capstone projects within 7 days of program completion.

Complete and submit all assignments, projects and case studies within the deadlines.

Successfully complete all course modules along with at least 80% of self-learning videos.

Avoid malpractices during tests or assignments, as violations will lead to permanent disqualification.

Clear the Placement Readiness Test (PRT) to enter the placement pool and gain access to job opportunities.

What is expected from candidates during the job assistance period?

During the job-assistance period, candidates are expected to:

Give 100% effort to secure a job.

Attend all career preparation sessions conducted by the program.

Actively apply to at least 30 jobs per month.

Go through the entire selection process if shortlisted for an interview.
